About Me

Self-motivated and dedicated software developer with a passion for continuous learning and growth. Seeking opportunities to apply and enhance my skills in web and mobile development, with expertise in JavaScript, React, Node.js, and other relevant technologies. Committed to contributing to innovative projects and staying up-to-date with industry trends and best practices.

Professional Experience

Freelance Web Developer

2021 - Present

Key responsibilities:

- Collaborated with clients to develop and deploy responsive websites, meeting their specific requirements and design preferences.
- Utilized front-end and back-end technologies to deliver functional and visually appealing web applications.

Self-Learning and Professional Development: 2018 – present

Key responsibilities:

- Continuously expanding knowledge and skills through online courses, tutorials, and self-study.
- Actively participating in coding communities and forums to exchange knowledge and stay updated on industry trends.

Projects

Faculty Evaluation System (Database: Firebase, RESTful API)

- Developed a web-based faculty evaluation system using Firebase as the database and implementing a RESTful API for data retrieval and manipulation.
- Designed and implemented the frontend using React, ensuring an intuitive user interface and seamless user experience.
- Integrated user authentication, allowing different user roles and access levels for administrators and faculty members.

PHP PWD Job Application

- Developed a PHP-based job application system targeting persons with disabilities (PWD).
- Designed and implemented a user-friendly interface for PWD applicants to submit their job applications and upload necessary documents
- Implemented validation and secure data handling to ensure the privacy and integrity of applicant information.

Tracking System (React-Native, Firebase)

- Implemented a tracking system application using Java, utilizing Firebase for data storage and real-time updates.
- Developed a user-friendly interface with interactive maps and markers to track and monitor assets or vehicles in real-time.
- Integrated notifications and alerts for location updates and geofence breaches.
